ENGINEERING • DESIGN • AUTOMATION

Architecting High-Performance Digital Products for Modern Enterprises

Tekloria is a specialized software engineering and digital transformation studio based in Hyderabad, India. We partner with ambitious startups and established enterprises to design, build, and deploy custom web platforms, cross-platform mobile apps, bespoke ERP systems, and autonomous AI agents designed for frictionless scale.

100%
CODE OWNERSHIP
Full unencumbered IP rights, Git repositories, and zero vendor lock-in.

<1s
CORE WEB VITALS
Sub-second load times engineered for high conversion rates and SEO dominance.

60fps
MOBILE UI/UX
Fluid gestures and offline-first data caching across iOS and Android.

24/7
AI & AUTOMATION
Intelligent conversational agents and autonomous business workflows.

Our Complete Service Portfolio

8 CORE ENGINEERING DISCIPLINES

01 Custom Web Application Development
Modern Next.js platforms, SPAs, headless e-commerce, and high-volume REST/GraphQL APIs.

02 Mobile Application Engineering
Cross-platform React Native & Flutter apps with offline sync and native hardware integrations.

03 Graphic & UI/UX Product Design
Visual brand identities, scalable Figma design tokens, interactive prototypes, and marketing assets.

04 Enterprise ERP & Internal Tools
Custom operational suites with role-based access control, billing automation, and supply chain tracking.

05 Business Strategy & Technical SEO
Organic search visibility, conversion rate optimization (CRO), and telemetry product analytics.

06 HR Recruiting & Technical Staffing
Vetted software engineers, UI/UX designers, and tech leads placed within 7–14 business days.

07 AI Chatbots & Autonomous Agents
Fine-tuned LLM agents, retrieval-augmented generation (RAG), and 24/7 multi-channel customer engagement.

08 Intelligent Business Automations
End-to-end workflow RPA, custom middleware APIs, webhooks, and automated system synchronization.

PILLARS OF DEVELOPMENT

Digital Products Engineered for Speed and Scale

From user-facing web and mobile storefronts to mission-critical backend operational engines.

01 Web Application Development

High-performance, accessible single-page (SPA) and server-rendered (SSR) applications built on modern frameworks with strict security and high conversion rates.

KEY DELIVERABLES

- Custom SPAs, Micro-frontends & Next.js Platforms
- Headless E-Commerce with Stripe & Global Gateways
- Sub-second Core Web Vitals (<1s) for Top SEO Rank
- High-Throughput RESTful & GraphQL Cloud APIs

React 19 | Next.js | TypeScript | Tailwind CSS | Node.js

02 Mobile App Development

Fluid, 60fps native and cross-platform applications engineered for iOS and Android with intuitive gestures and robust offline-first synchronization.

KEY DELIVERABLES

- Production iOS & Android Apps from Single Codebase
- Biometric Auth (FaceID/Fingerprint), Camera & BLE
- Offline-First SQLite Caching & Real-Time Sync
- Complete App Store & Google Play Launch Management

React Native | Flutter | Firebase | HealthKit | SQLite

03 Graphic & UI/UX Product Design

Human-centered user experience design, comprehensive brand visual identities, interactive Figma component systems, and promotional marketing collateral.

KEY DELIVERABLES

- Comprehensive Brand Identity & Logo Guidelines
- Production-Ready Figma Design Systems & Tokens
- Interactive Clickable Prototypes & Usability Audits
- Conversion-Optimized Marketing Creatives & Posters

Figma | Design Systems | UI/UX | Brand Identity | Adobe Suite

04 Enterprise ERP Systems

Bespoke Enterprise Resource Planning software engineered to break data silos, centralize multi-warehouse supply chains, automate billing, and streamline operations.

KEY DELIVERABLES

- Granular Role-Based Access Control (RBAC) & Logs
- Automated Multi-Currency Billing & Tax Calculations
- Live Multi-Warehouse Inventory & Supply Chain Tracking
- Seamless Banking, CRM & Logistics API Bridges

Python | PostgreSQL | Docker | Redis | Microservices

AI, GROWTH & AUTOMATION

Intelligent Workflows & Strategic Expansion

Harness conversational AI, automated data pipelines, and senior tech talent to drive enterprise growth.

05 Business Strategy & SEO

Data-engineered organic search architecture, conversion rate optimization (CRO), multi-channel acquisition funnels, and retention metrics.

KEY DELIVERABLES

- Comprehensive Technical SEO Auditing & Rich Schemas
- Conversion Rate Optimization (CRO) & Funnel Testing
- Multi-Channel Digital Strategy & Targeted Acquisition
- End-to-End Retention Analytics & Churn Diagnostics

Technical SEO | CRO | Google Analytics 4 | Growth Funnels

06 HR Recruiting Services

Rigorous technical screening, coding assessments, and placement for senior software developers, product designers, and tech leads.

KEY DELIVERABLES

- Deep Coding, Architectural & Problem-Solving Vetting
- Direct Hire Placement & Dedicated Staff Augmentation
- Culture & Philosophy Match Assessments
- Rapid 7–14 Day Candidate Turnaround Pipeline

Tech Screening | Staff Augmentation | Direct Hire | Executive Search

07 AI Chatbots & Agents

Intelligent conversational agents and custom LLM workflows that engage customers 24/7, automate support tickets, and triage inquiries.

KEY DELIVERABLES

- Domain-Fine-Tuned LLMs & RAG Architectures
- 24/7 Multi-Channel Sync (Web, WhatsApp, Slack, CRM)
- Context-Aware Autonomous Task Action Agents
- Automated Lead Qualification & Bi-Directional CRM Sync

OpenAI / Claude | LangChain | RAG | Vector DBs | WhatsApp API

08 Intelligent Automations

Eliminate manual bottlenecks and human error with bespoke robotic process automations (RPA), custom API webhooks, and system sync.

KEY DELIVERABLES

- End-to-End Robotic Process Automation (RPA)
- Custom Middleware APIs, Webhooks & System Bridges
- Cross-Platform CRM, ERP & Financial Reconciliation
- Real-Time Incident Triaging & Automated Alerts

RPA | Webhooks | Make / Zapier | REST APIs | Node.js

THE TEKLORIA 4-STAGE DELIVERY PROCESS

TRANSPARENT • ON-TIME • PREDICTABLE

PHASE 01
Discovery & Specs
Requirements audit, user stories, database schemas, and fixed milestone scoping.

PHASE 02
Agile Sprints
Two-week agile iterations with live staging demos and continuous feedback.

PHASE 03
QA & Security
Load stress testing, security audits, and cross-device responsive verification.

PHASE 04
Deployment & SLA
Zero-downtime launch, full code repository handover, and ongoing 24/7 maintenance.
